

Mc Millan Stocks

D.F. Maisey Gunsmithing has been an authorised New Zealand dealer for McMillan USA fiberglass and carbon -fibre since 1998. Most of the McMillan stocks that we get import are custom-order stocks for the rifle builds that we undertake, or for customers who just want to purchase a top-quality stock for their existing rifle. With the huge number of stock models, action inlets, construction options, accessories, or the various colours and finishing options available, there are literally thousands of different option combinations available, and as such it is impossible for us to stock everything that a customer may possibly want. Lead-time on custom-order McMillan stocks through us is usually in the 4-6 months range. Some custom order stocks for certain low-demand models may take a bit longer than normal (Such as sako L461). Some stocks from their online store may be able to be sourced in as little as a month if the order can be combined with a shipment of other stocks. (We receive all orders from McMillan via airmail. We are not bringing in container loads, or using 'surface freight'.)

We do however purchase a few standard-issue stocks from their online store, or the occasional 'custom surplus' stocks that may become available from time-to-time. The few stocks listed here which are available for purchase are shown with pics for each, and the prices are in NZ dollars, and include GST. (Freight/import costs component is incorporated into the listed price.) *(NOTE: Please contact us if you are interested in purchasing one of these stocks to check that they are still actually available. We only get to update the website and this list occasionally (and not on a daily basis) so please bear in mind that occasionally stock items get sold and we don't always get a chance to update the availability list promptly, or an item may be being 'held' for someone pending receipt of payment.)*

McMillan-USA have been the worldwide industry leaders in fiberglass rifle stocks for decades, with a reputation for quality that others can only strive to match or imitate.
